

Transport Report

Realtime Solar powered timetables are now in place at bus shelters - Outside Poppyfields development. The one opposite Sports and Social Club. Shelter at top of Grimston Lane.

We are still waiting to hear regarding having a Realtime timetable at the shelter outside The Lilacs development. Reason for delay is due to it having to be mains powered via hooking up to the street light by shelter as a solar powered one would mean the large solar panel would be directly in front of a resident's bedroom window.

There was talk of simply not installing one at this particular stop, but this would not be fair on those using stop or the developer fully fulfilling their obligations. So a case of 'watch this space'.

As far as having Realtime timetables at the Sausage Shop shelter and one opposite St Martin's Green - it has to be noted that the ones we do have were all paid by the developers of Poppyfields and The Lilacs, not by the Parish Council.

There are, unfortunately, no current plans for further Realtime timetables but hopefully that might change going into the future.
